To Whom it May Concern,

This message represents a short note to those who may be considering Excel Imaging for their preventative maintenance and imaging needs.

I have dealt with Excel Imaging for well over a decade. During that period, their personnel have consistently provided our department with exceptional service! When emergencies arose, their representatives have promptly responded to our needs, allowing for minimal downtime.

Importantly, I have found their personnel (at every level) to be very reasonable, and extremely knowledgeable about current technological changes within the imaging industry. They have consistently provided us with cost-effective alternatives when an upgrade of our imaging system has been necessary. Moreover, their contracts have always been competitively priced.

Taking all of this into consideration, it is with a very high level of enthusiasm that I can recommend Excel Imaging to you.

Sincerely,

A handwritten signature in black ink that reads 'Richard N. Sifers'.

Richard N. Sifers, Ph.D.
